EXAMINER'S COMMENT

1. The petition requesting that all nucleotide sequences be examined in this application has been rendered moot by its reassignment to the present examiner. In view of the unique circumstances of this particular application, the most equitable course of action is to examine all nucleotide sequences present in the application. Hence, the current examiner searched SEQ ID NOs: 4-9 and telephoned the attorney as detailed in the supplemental response filed November 19, 2004, resulting in the instant allowance of the application.

2. The following is an examiner's statement of reasons for allowance: The prior art of record teaches fragments of each of SEQ ID NOs: 4-9, which read on the claims under examination. However, in view of the amendments to the claims deleting the "at least a portion of" language, the art no longer reads on the claimed polynucleotide sequences. Further, Examiner agrees with the arguments filed June 9, 2003 regarding the Black et al. reference, thus, the rejection over that reference is withdrawn.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
